TECHNICAL FOCUS

Sealink International Berhad

Beneficiary of Stronger OSV Demand

- SEALINK's net profit turned positive in the last 2 quarters on the back of stronger • revenue.
- The group could benefit from the stronger demand for Offshore Support Vehicles (OSV) from major O&G players.
- Meanwhile, the decrease in the supply of OSVs should provide support to the daily charter rates.
- Technically, SEALINK has experienced a breakout above RM0.18 and consolidated sideways. Monitor for a breakout, targeting RM0.23-0.24, with a LT target at RM0.25. Support is located around RM0.19-0.195, while cut loss is at RM0.185.

SEALINK daily: Sideways consolidation breakout

Bloomberg

Trading Catalyst

- SEALINK turned positive in the latest 2 quarters. SEALINK has turned profitable in 2Q23 to RM7.3m vs a net loss of -RM7.5m and noticed a sequential improvement in 3Q23, registering a net profit of RM2.3m, on the back of revenue increase from RM30.3m (+41.0% YoY).
- Stronger demand for Offshore Support Vehicles (OSV) from major O&G players. Petronas has maintained a positive outlook from 2023-2025 and this should have positive spillover effects to sustain demand of OSVs for the maintenance activities of offshore facilities.
- Decrease in the supply of OSVs should provide stronger near-term demand. The market imbalance due to the decreasing supply of OSVs should position SEALINK to utilize more OSVs to meet the demand in the medium term, while also benefiting from the higher daily charge rates.
